

AUTO HAMMER

Slap when put over and stop when released

It is an automatic hammer powered by compressed air that does not need to be swung like a hammer.

Meat mallet package

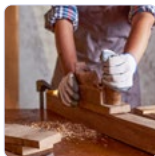

Features

- The Auto Hammer doesn't have to be swung like a regular hammer.
- When the hammer tip comes into contact with the workpiece, the blow is automatically executed.
- Strikes are possible in cracking and continuously.
- Power by compressed air.
- Tips can be exchanged. (Plastic, aluminum, steel, etc.)
- It minimizes worker fatigue and thus increases productivity.

Specification

Product weight	1,250g
Size	ø80 × 300mm
Striking force	50~85kgf
Strikes per minute	1,000th
Air Pressure	4~7kgf/cm ²
Air Consumption	50~110ℓ/min

Applications

Woodworking shop

Assembly site

Construction site

Foundry

Commercial kitchen
