# SKIN REMOVER

Peeler to remove skin **with compressed air**

It is a device that blows compressed air to remove the bark and soil parts of green onions, chives, and root vegetables with little loss.

Sensor responsive 2-prong stripper (SR360)

Portable 1-prong Stripper (PSR360)

※ Configurable for input type selection  
(e.g. spring onion + spring onion, spring onion + chives, chives + chives)

## Features

- Simple in structure and convenient to use
- Unskilled workers can work
- Light weight and small size for easy movement
- Long life, no failures, low maintenance costs
- Less damage, increasing the value of the product
- Easy to dispose of by-products
- Operation sensor reduces compressed air consumption

Before peeling skin

After peeling skin

Peeling appearance

## Ability to peel

Type of inlet	Inlet large (green onion, ø40)		Inlet small (chives, ø25)		Remark
	1EA	2EA	1EA	2EA	
Number of inlet outlets	1EA	2EA	1EA	2EA	
Peeling amount (kg/8h)	672	1,344	100	200	Operation rate 70%
Time	3 sec		2 sec		1 green onion : 100g 1 chives : 10g

## Air consumption using inlet (ℓ/min)

Pressure (kgf/cm <sup>2</sup> )	Inlet large (green onion, ø40)		Inlet small (chives, ø25)		Comp specification 'Note'	
	1EA	2EA	1EA	2EA	Output (kW/hp)	Air volume (ℓ/min)
5	1,100	2,200	530	1,060	11 / 15	1,909
6	1,300	2,600	610	1,220	15 / 20	2,518

※ There may be differences depending on the quality of the green onion.
