PIPE CLEANER

PIPE CLEANER to clean the inside of the tube with pellet

It is a pipe cleaner that fires foamed pellet with compressed air to clean debris inside pipes such as hoses, tubes, pipes, etc.

Features

- The product consists of a launch part, a connection and a pellet
- Fire a Pellet larger than the inner diameter (about 5~20%) to wipe the inner surface and remove contaminants in the open direction
- Formed pallet passes through 90°, T Joint, Coil, U-shaped bend shape
- Use compressed air as a power source
- When equipped with a fluid suction port, it mixes fluid and air
- Draw-line for cable construction reduces installation time
- Environmentally friendly, easy to operate, safe and lightweight, innovative

Applications

Cleaning residential heating pipes

Cleaning pipes and tubes

Cleaning pipes of various manufacturing and industrial facilities

Specifications

Weight	1.2kg
Air pressure	4~6kgf/cm ²
Nozzle size	Inner diameter ø 3~100mm
